

## UNION SQUARE RECEIVES NATIONAL LANDSCAPE AWARD

George E. Michael & Co., Inc. has been honored with the American Society of Landscape Architects' Merit Award for its Union Square commercial project in New Hope, PA.

Union Square was a venture which posed numerous challenges for landscape design. As a former paper mill, the site was unattractive, yet situated in the center of the picturesque town of New Hope. Planting areas had to be easy to maintain and hearty, while still softening the buildings that would surround them.

This award is very significant for our custom building and renovating company. Our philosophy has always been to dedicate 110% to beautification of the ground we work with and to finish all of our sites with a well defined and striking landscape. Landscape Design Group did a superior job in designing and sculpting the site while promoting local species of vegetation and trees. Choice plantings and pedestrian friendly design will continue to support this site as a long term, healthy landscaped setting.

Whether it is fine homebuilding, custom renovation or a commercial project such as Union Square, we strive to blend the architecture with the landscape – to make every job a perfect presentation.
